PROFILE

I'm currently studying at university, majoring in computer science and coding. originally from Kampong Cham province. I was raised by my parents who ran their own business. They taught me the value of humility, responsibility, and generosity.

My journey to the city for university has been fueled by my passion for computer science and coding, which began in high school. Pursuing higher education, I'm eager to dive deeper into these subjects and apply knowledge in practical settings.

Despite not having prior work experience, I'm enthusiastic about gaining hands-on experience in the field of work. I believe this opportunity will not only develop me but also help me to learn and have more experience about the outside world.

WORK EXPERIENCE

Family business

During high school, I actively assisted my parents in selling I actively helped my parents in the sale of goods will farm as part of their business. This hands-on experience not only exposed me to the intricate world of sales but also engaged with customers, understanding their needs, and providing them with tailored solutions.
